

Igor Pivnyk

Senior iOS / macOS Developer

consul87@gmail.com | Haifa, Israel | [linkedin.com/in/igorpivnyk](https://www.linkedin.com/in/igorpivnyk) | **Open to Remote**

Professional Summary

Senior iOS and macOS engineer with 9+ years of experience shipping production software across cybersecurity, medical devices, consumer apps, and developer tooling. Deep expertise in Swift, Objective-C runtime internals, Core Bluetooth, and C++ cross-platform layers. Consistent track record of owning features end-to-end — from technical design to delivery — and driving architectural improvements that increase stability. Experienced in cross-functional collaboration with distributed international teams. Integrates AI-assisted tools (Claude Code, Copilot) into daily engineering, planning, and documentation workflows. Actively seeking fully remote roles.

Experience

Oct 2023 – Present

Check Point Software Technologies

Senior iOS / macOS Developer • Tel Aviv, Israel

Harmony SASE — enterprise VPN and network security client for macOS and iOS • Team of 9

- Designed and delivered **WiFi Security Suppression** — intelligent VPN suppression when on a trusted network; created the technical epic and owned implementation end-to-end
- Built **unified cross-platform logging** for Windows, macOS, and Linux clients — standardized log filenames, verbosity levels, and rotation policies across all three platforms, with remote runtime reconfiguration of logging settings
- Led **architectural refactor** replacing CLI calls with direct API calls across the codebase, improving app stability and long-term maintainability
- Restored dropped iOS platform support**: diagnosed customer-reported issues through deep git archaeology, CI pipeline adjustments, and TestFlight distribution
- Developed C++ shared libraries and Swift network code for VPN/security layer using the NetworkExtension framework
- Built and maintained CI/CD pipelines with GitHub Actions

Sep 2022 – Oct 2023

Appltools

Senior iOS Developer • Ramat Gan, Israel

AI-powered visual UI testing SDK — on-device library injected into customer apps + server-side iOS UI reconstruction engine

- Extended and fixed SDK support for UIKit and SwiftUI components, both on-device and in the server-side UI reconstruction pipeline
- Reverse-engineered customer apps using Objective-C runtime manipulation, method swizzling, and binary disassembly (Hopper) to diagnose and resolve test-correctness issues caused by non-standard UI implementations
- Wrote automated tests ensuring correctness of a quality-critical developer SDK

Oct 2020 – Sep 2022

Shutterfly Inc.

Senior iOS Developer • Haifa, Israel

Consumer photo storage & gifting app — 1M+ downloads, US/Canada market • iOS team of 5 • Collaborated with US headquarters

- Led **Selective Checkout** — enabling users to purchase specific cart items independently; owned design, implementation, and cross-team coordination through delivery
- Implemented complex **drag-and-drop photo placement** in the photo book editor: gesture-driven interaction for placing thumbnails from a scroll bar onto book pages
- Conducted code reviews and mentored junior developers
- Cross-functional collaboration with US-based product, QA, web, and backend teams

Aug 2016 – Oct 2020

CNOGA Medical

iOS Developer • Caesarea, Israel

Non-invasive medical glucometer and instruments — iOS companion apps with Bluetooth connectivity

- Sole iOS engineer for 4 years — full ownership of all iPhone and iPad applications
- **Built Core Bluetooth SDK from scratch**, replacing the legacy implementation with a clean, maintainable architecture for device communication
- **Significantly reduced application crash rate** through systematic stability analysis and targeted fixes
- Managed full App Store release cycle: certificates, provisioning, submission, and review
- Collaborated closely with embedded and hardware engineering teams

Technical Skills

Languages	Swift • Objective-C • C++
iOS / macOS	UIKit • SwiftUI • AppKit • Core Bluetooth • CoreData • NetworkExtension • Combine • Swift Concurrency • XCTest / XCUITest • Keychain • APNs • RESTful APIs
Architecture	MVC • MVVM • MVP • Clean Architecture • TCA • Dependency Injection
Tooling	Xcode • Instruments • LLDB • CocoaPods • SPM • fastlane • GitHub Actions
Low-Level	Objective-C Runtime • Method Swizzling • Memory Profiling • C++ Interop • Binary Analysis (Hopper)
AI Tools	Claude Code (daily) • GitHub Copilot • Windsurf • Codex

Education

East Ukrainian State University

2004 – 2009

Bachelor of Science — Mechanical Engineering • Luhansk, Ukraine
